

Achieve Brown County Early Childhood System of Care

Universal developmental screenings allow early childhood care providers to refer children to local services to help families. When children with identified needs get supports early on, their educational outcomes are greater than those who do not receive support.

Over a two-year period targeted roll out of universal developmental screenings will lead to

increased annual screenings

Align Community Partners

Set Data-Driven Goals

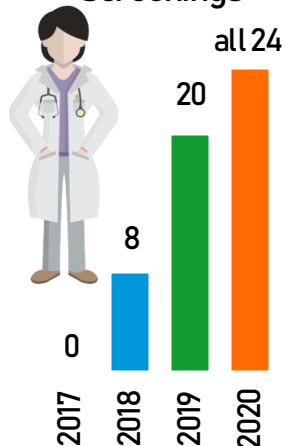

Drive Change

Target:
100% of children are ready for school

Universal screenings detect needs and help kids!

Clinics in Brown County with Universal Screenings

Our goal:
100% of kids with need referred to services
Early in Life

Our goal:
100% of kids with need complete services
